

Non-invasive wearable
device for real-time
stroke detection

Yale

KEVIN SHETH, MD
CMO & CO-FOUNDER
www.alva-health.com

PROBLEM

Ischemic Stroke affects **700,000** Americans and **13MM** people globally per year

\$67B annual avoidable US healthcare spend

Disability, premature death can be prevented by drug (tPA) within 4.5hr of stroke onset

85% of stroke victims miss the tPA treatment window

EFFECT OF TREATMENT DELAY

20% OF STROKE VICTIMS DIE

160,000 PEOPLE / YR

10% SURVIVORS UNABLE TO CARE FOR SELF, NEED LONG TERM CARE OR SKILLED NURSING

56,000 PEOPLE / YR

40% SURVIVORS WITH MODERATE OR SEVERE DISABILITY, NEED SPECIALIZED CARE

224,000 PEOPLE / YR

25% SURVIVORS WITH MINOR DISABILITY

140,000 PEOPLE / YR

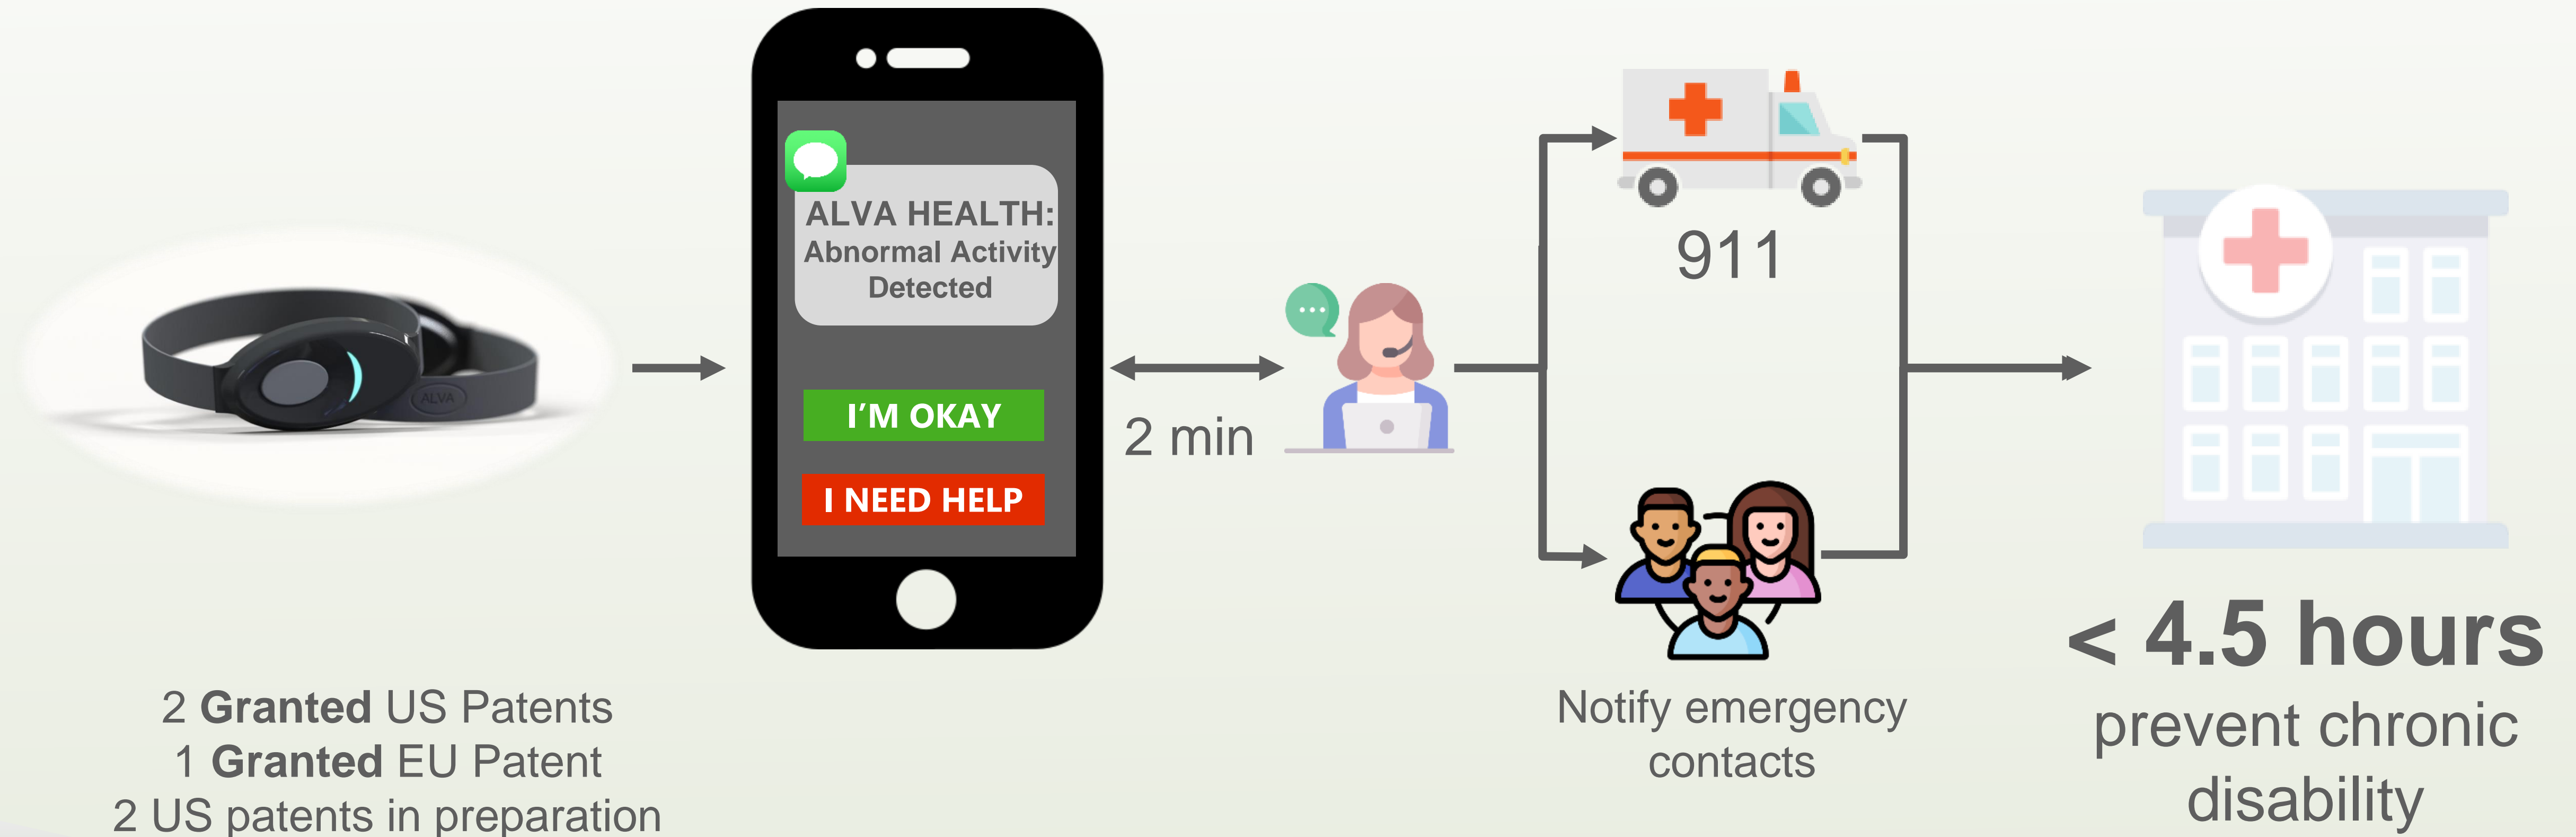

SOLUTION

A non-invasive wearable
that identifies stroke
within the critical 4.5
hour tPA treatment
window

Detects asymmetries in upper body
movement, a hallmark of stroke

HOW IT WORKS

PREVIOUS STUDIES

STROKE PATIENT STUDY

N > 200

TPR =
97%

High sensitivity in moderate-
to-severe strokes

HEALTHY VOLUNTEER STUDY

MAPLEWOOD
Senior Living

N=50

TNR =
99.8%

Low false positive rate,
1 per 21 days*

* expected to decline before
commercialization

UPCOMING STUDIES

DE-CENTRALIZED PILOT STUDY Initiating 1H 2023

- **PURPOSE:** Demonstrate monitoring up to 30 days, assess usability & comfort level with Alva's device
- Enroll under 100 subjects, including healthy & stroke survivors

MULTI-SITE PILOT STUDY Initiating 2H 2023

- **PURPOSE:** Demonstrate remote monitoring up to 90 days, event detection
- Gather necessary data for algorithm & design lock prior to FDA pivotal study
- 3-5 research sites
- Enroll under 300 high stroke-risk subjects

INITIAL TARGET MARKET

Patients at risk of recurrent stroke

1.1 M
PATIENTS / YR

\$4B
MARKET

640,000 stroke survivors

500,000 Transient Ischemic Attacks

BARRIERS TO ENTRY

Custom wearable devices with battery life ≥ 30 days

IP: 2 US patents granted, 1 EU patent granted, 2 US in preparation

Proprietary stroke detection & fall detection algorithms

Extensive database of wearables data in stroke patients

Cloud based solution on AWS

Cleared informal FTO search

Trademarks in progress
